

Data upload

Use this panel to load your count data. The example data set is already preloaded.

Data structure

Each column should represent a separate series of counts. If the first row contains headers, mark the Header checkbox. The type of your .csv file might be further specified.

Choose CSV File with count data:

No file selected

☒ Header

Type of csv file

- ☒ Dec: dot (.), Sep: comma (;)
- ☐ Dec: comma (,), Sep: semicolon (;)
